

PROFESSIONAL SUMMARY

Technical Systems and Business Intelligence professional with experience supporting enterprise applications, analytics infrastructure, SQL environments, automation, and operational systems. Skilled in troubleshooting technical issues, optimizing workflows, supporting cross-functional teams, and improving system performance through data-driven solutions.

Experienced working in fast-paced environments requiring adaptability, problem solving, and collaboration across technical and non-technical departments. Proficient in SQL, Python, Power BI, enterprise reporting systems, process automation, and technical operations support within fast-paced environments.

CORE COMPETENCE

- Enterprise Systems Support
- Systems Troubleshooting
- Technical Documentation
- User Support
- Process Automation
- SQL Server
- Technical Operations Support
- Incident Resolution
- System Monitoring
- Cross Functional Collaboration
- Data Validation
- Root Cause Analysis
- Application Support
- Enterprise Reporting Systems

WORK EXPERIENCE

Technical & BI Consultant Jan 2025 - Present
Freelancer — Remote

- Built automated reporting systems to track website performance and user behavior, reducing manual reporting by 40%.
- Analyzed customer engagement data to identify trends and improve content performance and conversion rates.
- Developed dashboards that enabled clients to make data-driven decisions around marketing and digital strategy.
- Collaborated with marketing teams to align reporting metrics with campaign performance and ROI.
- Developed and maintained web-based reporting tools and dashboards that improved visibility into operational and customer engagement data.

Business Intelligence Analyst Jan 2023 - Nov 2024
Bombardier Recreational Products (BRP) — Sturtevant, WI

- Developed 15+ Power BI dashboards providing real-time visibility into operational and performance metrics.
- Automated reporting workflows using SQL and Python, reducing manual effort by 60% and improving data accuracy.
- Analyzed production and operational data to identify inefficiencies and support process improvements.
- Integrated data from multiple sources to create unified reporting systems, improving visibility across teams.
- Conducted root-cause analysis on performance issues, enabling faster resolution and improved system reliability.

WORK EXPERIENCE

Technical Engineer I & II

Bombardier Recreational Products — Sturtevant, WI

Jan 2023 - Aug 2023

- Optimized SQL queries and Python analytics supporting enterprise manufacturing systems, improving data retrieval speed and system reliability.
- Analyzed performance and sensor data to identify degradation patterns, enabling proactive interventions that reduced downtime.
- Collaborated cross-functionally with engineering and IT teams to improve data accessibility and streamline analytics workflows.
- Developed automated diagnostic scripts that accelerated issue detection and reduced recurring operational disruptions.

Software Developer

Infosys — Milwaukee, WI

Oct 2021 - Feb 2023

- Engineered scalable APIs and backend services that improved data flow between enterprise systems, reducing latency by approximately 25%.
- Built analytics-ready UI components for internal dashboards, enhancing leadership visibility into key performance indicators.
- Partnered with product, QA, and analytics teams to resolve data inconsistencies, reducing data-related defects by 20%.
- Implemented enhanced monitoring and error-handling logic, supporting faster root-cause identification and decision-making.

Special Education Teacher & Evaluator

Educational Institutions

July 2004 - June 2021

- Led weekly data review meetings using student performance metrics to design individualized learning plans—significantly improving outcome predictability.
- Built and analyzed school-level data models that improved accuracy in student placement decisions.
- Presented insights to multi-disciplinary teams, ensuring data transparency and alignment on interventions.

EDUCATION

MBA, Business Intelligence & Analytics Management —
Keller Graduate School of Management

BA, Educational Studies —
Clark Atlanta University

Google UX Design Specialization —
Coursera

Data Analytics & Visualization Post Grad Certification —
Georgia Tech

HIPAA Training
Accountable

TECHNICAL SKILLS

Data: SQL, Python, Excel, Power BI, Tableau, Data Visualization, Data Modeling, ETL Concepts

Developer Tools: React, Next.js, Node.js

Design: Figma, UX Research, Prototyping

Cloud & DevOps: AWS, Jenkins, CI/CD
